Self Lubricating Metal Repair System

Belzona® 1131 (Bearing Metal) is a two component paste grade repair system with self lubricating properties for creating low friction surfaces subject to intermittent contact and low specific loads.

Belzona® 1131 (Bearing Metal) will:

- Simplify maintenance procedures
- Reduce the need for spare parts
- Cut downtime
- Improve safety by reducing hot work

This fully machineable product can be applied without the need for specialist tools and bonds to virtually any surface including steel, aluminium, copper, fibreglass laminate, stainless steel, glass, concrete and brass.

Belzona® 1131 (Bearing Metal) has a unique micro-porous structure to trap and hold lubricating oil, minimising friction at start up.

Belzona® 1131 Bearing Metal

Bushings

Bearings

Low Friction Surfaces

Pipe Supports

Applications for Belzona® 1131 (Bearing Metal) include:

- Shafts
- Bearings
- Bushings
- Guides
- Slideways
- Pipe supports
- Low friction surfaces

Belzona® provides the solution to your repair and maintenance needs.

BELZONA[®]
Repair • Protect • Improve

Belzona® 1131 (Bearing Metal) is:

Simple

- No specialist tools required
- Easily mixed and applied

Safe

- Cold temperature cure ensures no fire risk
- Excellent electrical insulation properties

Versatile

- No expansion, contraction or distortion during cure
- Apply thick or thin sections in one operation
- Stays in place when applied to overhead and vertical surfaces
- Bonds strongly to almost any surface
- Moulds to precise contours
- Fully machinable with conventional tools

Effective

- The porous oil- holding surface of the product minimises wear at start-up and reduces risk of seizure in the event of lubrication starvation.
- High mechanical strength
- Excellent heat resistance
- Outstanding chemical resistance to a wide range of chemicals
