CARBON DIOXIDE (Cylinder)

MATERIAL SAFETY DATA SHEET (MSDS Number – MGC P030013)  Effective Date: July 2015

1. CHEMICAL PRODUCT AND COMPANY IDENTIFICATION

PRODUCT NAME: Carbon Dioxide
CHEMICAL NAME: Carbon Dioxide
FORMULA: CO2
CAS No.: CO2 124-38-9
[USE]: Beer and soft drink dispensing, gas purging, food packaging, welding, fire fighting, scientific equipment testing applications

NAME AND ADDRESS:
Motukea Gas Company Limited,
Motukea Island, Porebada Road,
Port Moresby, PNG
Contact Telephone: (675) 321-8187

2. COMPOSITION / INFORMATION ON INGREDIENTS

INGREDIENT NAME:
Carbon Dioxide CO2 99.9%
OSHA PEL: None
ACGIH TLV: xxxx
[LD50]: None. [LC50]: None.

3. HAZARDS IDENTIFICATION

NOT CLASSIFIED AS HAZARDOUS ACCORDING TO NOHSC CRITERIA CLASSIFIED AS A DANGEROUS GOOD BY THE CRITERIA OF THE ADG CODE.

DANGER:
CONTENTS UNDER PRESSURE
DO NOT PUNCTURE OR INCINERATE CONTAINER,
MAY EXPLODE IF HEATED

MAY CAUSE SEVERE FROSTBITE WHEN RELEASED AT FAST RATE

POTENTIAL HEALTH EFFECTS INFORMATION-

ROADS OF EXPOSURE:
Swallowed: Seek medical attention immediately. Drink large quantities of water (not hot) to help thaw affected areas.
Skin: CO2 can cause severe cold burn upon contact with skin when released at a fast rate.
Eyes: Immediately flush eyes with unheated tap water for at least 15 minutes. Obtain medical assistance.
Inhaled: In high concentrations may cause asphyxiation. Symptoms may include loss of mobility/consciousness. Remove victim to uncontaminated area whilst wearing self contained breathing apparatus (SCBA). Victim may not be aware of asphyxiation. Keep victim warm and rested. Call a doctor. Apply artificial respiration if breathing stopped. Continued treatment should be symptomatic and supportive.

4. FIRST AID MEASURES

INHALATION: Remove person to fresh air. If not breathing, administer artificial respiration. If breathing is difficult, obtain medical attention.
EYE CONTACT: Check for and remove any contact lenses. Immediately flush eyes with running water for at least 15 minutes, then consult a doctor.
SKIN CONTACT: Generally the product does not irritate the skin.
INGESTION: Not applicable.
NOTES TO PHYSICIAN: None.
5. FIRE FIGHTING MEASURES

FLASH POINT: Not applicable; gas.
AUTOIGNITION: None
FLAMMABLE LIMITS IN AIR BY VOLUME: NA
EXTINGUISHING MEDIA: Use an extinguishing agent suitable for the surrounding fire
SPECIAL FIRE FIGHTING INSTRUCTIONS: Wear self-contained respiratory protective device.
UNUSUAL FIRE AND EXPLOSION HAZARDS: Contains gas under pressure. Cylinders may rupture violently if sidewalls are exposed to direct flame impingement. Cylinders exposed to fire should not be moved until they have reached ambient temperature.

6. ACCIDENTAL RELEASE MEASURES

STEPS TO BE TAKEN IF MATERIAL IS RELEASED OR SPILLED: Before dealing with spillage take the necessary protective measures, inform others to keep at a safe distance. Contact supplier for specific assistance. Allow gas to escape to atmosphere, preferably in an open remote location. Prevent vented gas from re-entering ventilation intakes, low-lying spaces, cellars, drains, sewers or similar.

7. HANDLING AND STORAGE

PRECAUTIONS TO BE TAKEN IN STORAGE: Store cylinders upright in an enclosure, preferably outside of buildings, protected from direct sunlight. Secure cylinders by chains or similar device to prevent falling over. Store cylinders below 45°C. Keep away from flammable or combustible materials. Keep away from vehicular traffic and other thoroughfares. Prevent leaking gases from collecting in enclosed or low-lying spaces - gas in heavier than air. Protect from physical damage. Protect regulators and other fittings from impact.

High pressure gas. Do not puncture or incinerate container. Use equipment rated for cylinder pressure. Close valve after each use and when empty.

PRECAUTIONS TO BE TAKEN IN HANDLING:

8. EXPOSURE CONTROLS / PERSONAL PROTECTION

ENGINEERING CONTROLS:
VENTILATION: Use only with adequate ventilation. Use process enclosures, local exhaust ventilation or other engineering controls to keep worker exposure to airborne contaminants below any recommended or statutory limits.
RESPIRATORY PROTECTION (SPECIFY TYPE): General Use: None required.
PROTECTIVE GLOVES: Work gloves are recommended when handling cylinders.
EYE PROTECTION: Safety glasses are recommended when handling cylinders.
OTHER PROTECTIVE EQUIPMENT: Safety shoes are recommended when handling cylinders.
PRECAUTIONS: Do not wear oily clothes. Do not use oily or greasy cloth for cleaning CO2 cylinder or valves.

9. PHYSICAL AND CHEMICAL PROPERTIES

Appearance: Colourless gas
Boiling Point: Not applicable
Vapour Pressure: 6,300kPa @ 25°C
Volatile: 100%
Evaporation Rate: Immediate
Odour: Odourless
Vapour Density: 1.53 @ 0°C (Air=1)
Weight per ml: 1.02g
Flash Point: None
Flammability Limits: None
Auto-Ignition Temperature: None
Other Properties: Extremely cold, colourless liquid. Forms a “dry ice”: frost on evaporation at normal pressures, which sublimes to gaseous carbon dioxide. May react violently with dusts of some metals.

10. STABILITY AND REACTIVITY

Moist Carbon Dioxide is corrosive, therefore acid resistant materials are required. May evolve toxic gasses if heated to decomposition.

11. TOXICOLOGICAL INFORMATION

General: Carbon dioxide concentrations are in the air at:
- 3.5% - may cause increased respiration and headaches
- 8.15% - may cause nausea, headaches and vomiting. All which may lead to unconsciousness

12. ECOLOGICAL INFORMATION

General: Although a natural component of the earth's atmosphere, an increase in the atmospheric level of carbon dioxide has been linked with global warming. Therefore emission of Carbon Dioxide into the atmosphere should be minimised. Fumes from fabrication processes may be harmful to the environment.

13. DISPOSAL CONSIDERATIONS

WASTE DISPOSAL METHOD: Do not attempt to dispose of residual or unused quantities. Return cylinder properly labeled to Motukea Gas Company. Unserviceable cylinders should be returned for safe and proper disposal.

14. TRANSPORT INFORMATION

DOT/IMO SHIPPING NAME: CARBON DIOXIDE
HAZARD CLASS: 2.2
Hazchem code: 2TE
IDENTIFICATION NUMBER: UN 1013
PRODUCT RQ: None.
SHIPPING LABEL(s): NONFLAMMABLE GAS, NON TOXIC
PLACARD (When required): CO2 Compressed
SPECIAL SHIPPING INFORMATION: Cylinders should be transported in a secure position, in a well ventilated vehicle. The transportation of compressed gas cylinders in automobiles or in closed-body vehicles can present serious safety hazards and should be discouraged.

15. REGULATORY INFORMATION

The following information concerns selected regulatory requirements potentially applicable to this product. Not all such requirements are identified. Users of this product are responsible for their own regulatory compliance on a federal, state [provincial], and local level.
Product related hazard information:
Poison schedule: Not scheduled
Safety phrases:
Keep container in a well-ventilated place.
Do not breathe gas/fumes/vapour/spray (appropriate wording to be specified by the manufacturer).

16. OTHER INFORMATION

Prevent leaking gas from entering drains, gullies, natural depressions and enclosed spaces.
